## Log in Problem Troubleshooting

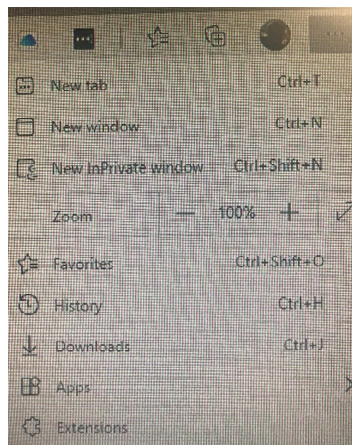

Having trouble logging in even though you have been on the site before? Here are some troubleshooting tips:

- Don't let your computer or phone suggest your email and/or password. Instead type it in the spaces to override the stored password in the computer.
- Try a different browser. If you are using Edge, try Chrome.
- Still no luck? Try a different computer or phone or iPad and see if the login works there. If it does, it is a problem with your initial device.
- Try clearing out "cookies". Search on the web on how to do that with your machine or phone.
- Try an "incognito" or "In private" window. These bypass computer cookies that still may be causing you problems.

In Chrome, hit the three dots in the upper right of the screen and then select New incognito window from the dropdown or select Ctrl+Shift+N

In Microsoft Edge, hit the three dots in the upper right of the page and then select New InPrivate window or also press three keys at once, Ctrl+Shift+N

Log In

- Still no luck? Try doing a password reset. Perhaps you have forgotten the password. To do that go to the log in screen on the website. Click on the forgot password link and follow the instructions.
- If that fails, contact the webmaster using the contact us link on the website home page and we will reset your account. You will need to create a new login and password when we do this.
